

Resolution Against Hosting President Donald Trump at the Libertarian National Convention

We, the Members of the Libertarian Party of Maine, express grave concern regarding the decision to host President Donald Trump at the upcoming Libertarian National Convention, considering that this convention serves as the platform for selecting our party's presidential candidate. Hosting President Trump on our stage during this crucial moment poses significant risks and challenges that could undermine the integrity of our nomination process and the principles of our party.

Furthermore, giving a platform to President Trump at our convention sends a confusing message to our members and the public about where the Libertarian Party stands on critical issues. While we advocate for individual liberty, limited government, and free markets, President Trump's track record reflects a different set of priorities, including expansive government intervention, protectionist trade policies, and restrictions on personal freedoms.

By inviting President Trump to speak at our convention, we risk diluting the distinct voice of the Libertarian Party and alienating supporters who expect us to uphold our principles without compromise. It undermines the credibility of our nomination process and calls into question our commitment to advancing libertarian ideals in the face of political pressure.

Therefore, be it resolved; we the Members of the Libertarian Party of Maine strongly urge the Libertarian National Committee to reconsider its decision to host President Trump as a speaker at our convention.
